## Fire Protection Contractor Responsibilities

Effective 11/1/2021 – In accordance with the currently adopted versions of the International Fire Code and NFPA 72 National Fire Alarm and Signaling Code, the Central Arizona Fire & Medical Authority (CAFMA) will require a pre-wire or rough inspection to be conducted on any system or component of said system that falls within the scope of the aforementioned Codes and Standards.

Current CAFMA permit fees associated with these inspections will address this additional requirement. However, these permit fees may change as part of the periodic fee schedule adjusted for inflation and other costs. This change should be anticipated for January 2022.

When scheduling a Fire Alarm Inspection with our office, please advise which inspection is being requested, i.e. rough or final.

If you have any questions please feel free to contact Fire Prevention at 928.772.7711.

Thank you,

*Rick Chase*
